

**ADPRO® FastTrace™**

**World-Leading  
Remote Video  
Surveillance  
Systems**

**Vision Systems**

## Why ADPRO® ?

Vision Systems' ADPRO products are specifically designed as the ultimate multi-site security and surveillance system, with the flexibility to deliver remote monitoring to a wide range of applications and vertical markets.

### ADPRO: The safe choice

We have over 25 years experience and expertise in providing cutting-edge CCTV technology. Due to our superior alarm-handling and image quality, ADPRO has been installed in over 40,000 customer sites worldwide. No other CCTV vendor can offer you the same security and peace-of-mind. Benefits include:

- ▣ **Access to Design Information:** shows you how to design a reliable detector-activated remotely monitored CCTV system.
- ▣ **Training:** comprehensive training conducted by industry experts— means you can efficiently install a reliable system and get on to your next job.
- ▣ **Technical Support:** experienced ADPRO staff are available to solve your problems quickly.
- ▣ **Reputation:** With over 40,000 systems sold, ADPRO solutions are proven to work in a wide range of applications. No matter what your security problem is, you can be sure that ADPRO covers your security needs.
- ▣ **Availability:** stocked by all major UK security wholesalers.

“We found ADPRO to be the best remote monitoring solution available on the market. Not only did ADPRO FastTrace have all the features we were looking for, but it is also compliant to the new BS8418 standard.”

Bob Marsh,  
Assistant to the  
CCTV Manager,  
Travis Perkins

## Why ADPRO® FastTrace™ ?

The ADPRO FastTrace video transmitter is designed with the user in mind and provides a feature-rich security solution, including:

- **Quick Access Remote Multi-Site Management**, allowing instant video access over a variety of communication links, including PSTN, ISDN, ADSL or other high speed networks.
- **Video Alarm Verification**, improving the CMS Operator's ability to assess a critical situation, thus allowing the correct alarm response to be immediately taken.
- **Superior Image Quality**, allowing face and number plate recognition.
- **Imaging Water Marking**, providing tamper-proof images and corresponding date stamps for use as admissible evidence.
- **Long Duration Recording**, allowing you to store about six times more video images than most other products on the market.
- **Fast & Flexible Recording Rates**, enabling the system to store up to 100 images per second.
- **Integrated PTZ preset on Alarm** associating an alarm input with a preset camera position so that, in the event of an alarm input trigger, FastTrace will send the PTZ camera to that preset position automatically.
- **Point & Click Zone Isolation**, allowing CMS Operators to quickly and easily isolate individual zones.
- **Simultaneous Access by Multiple Users** allowing recorded images to be accessed and simultaneously viewed from multiple locations.
- **Total System Integrity**, giving you a secondary back-up channel if a primary signal fails and automatic error notification about power failure etc.
- **Detailed Logging of Site Actions**, giving you instant retrieval access of up to 12 months worth of alarm activations from a typical site.
- **Ease of Installation**, allowing quick turn-around, keeping installation costs to a minimum.
- **Maintenance Free Operation**, ensuring continual, reliable and user-friendly operation.
- **Compliance to the British Security Standard BS8418**, ensuring best practice installation and monitoring.

"We have used ADPRO products for over a decade. ADPRO FastTrace continues to be a cost-effective solution for companies, especially those with existing high-speed networks and distributed locations. ADPRO's remote alarm handling functionality is particularly impressive."

Steve Nelson,  
Operations Director,  
Visual Verification (CMS)

When an alarm is triggered, images are automatically sent to the Central Monitoring Station.

An operator can use an onscreen map to conduct virtual guard tours of a site.

With solutions in over 40,000 customer sites and 400 Central Monitoring Stations worldwide, ADPRO security products are protecting a wide range of markets, including retail, transport, utilities, government, schools and restaurants.

**What customers using ADPRO FastTrace are saying:**

“Security and loss prevention don’t have to be time consuming, labour-intensive or costly. With ADPRO FastTrace we can control and manage the CCTV footage from all our retail outlets from one single video control room, resulting in reduced threat of violence, robberies and theft.”

Doug Cook, Corporate Security Manager at T-Mobile Retail

“ADPRO FastTrace alerts us to the presence of intruders before an attempted break-in, and the causes of alarm can be viewed live at our remote security control room. We were particularly impressed with the integrated video alarm verification features.”

James Thornton, Head of Security, BMW Park Lane, London

“ADPRO FastTrace has integrated voice and video surveillance technology making it the ideal solution when combined with a professionally delivered remote monitoring service to protect retail stores, car parks, train stations and many other distributed environments.”

Colin Walters, General Manager, RVR (CMS)

“ADPRO is so user friendly. We can retrieve incidents in seconds and the ability to take still photos is an added bonus. The evidence is there with the date and time – which is also helpful for parents. It’s also great that we’re able to transfer evidence on to a CD, which we can pass on as necessary.”

David Shepherd, Site Services Manager, Cliff Park High School

“ADPRO FastTrace will pay for itself in less than two years and the wireless capabilities have given us better quality images and lower maintenance and telecommunications costs.”

Laurence Chapman, Services Manager, Swindon Borough Council

**About Vision Systems**

Vision Systems is a global leader in remote video security surveillance, very early smoke detection and voice alarm solutions which protects business-critical assets across the world. Products include: ADPRO Integrated Security and Surveillance Solutions, VESDA Aspirating Smoke Detection Systems and Millbank Voice Alarm Solutions.

Established in 1984, Vision Systems has offices around the world and is supported by a global network of dealers and distributors.
